

TEST DEFECTS

1. **OTP:** The OTP takes a while to drop for mtn. This can be due to network but can still be looked into
2. **Statement of Account:** There is no feature to generate account statement from the app
3. **Profile Photo:** There should be a feature to edit profile photo. The picture we used for verification should not be automatically used as the profile photo
4. **App Name:** The app name should come as **Moniepoint** not **Personal**. After downloading and verifying I tried reopening the app, so I went ahead to search for moniepoint I couldn't find it then I took my time to look through all my apps and discovered it came as personal. I have attached a screenshot.
